# Introduction

## Graduate Outcomes Survey: Class of 2018

This report is a compilation of data gathered in summer 2019 for the annual Graduate Outcomes Survey issued by the HEA and supplementary data gathered by the Careers Centre, mainly from LinkedIn searches.

Since 2017 the HEA have required all IOT's to participate in the annual country-wide Graduate Outcomes Survey in accordance with the survey template that they have issued for this purpose. The iadt response rate to the survey was 38%. This is down from 51% last year and would be considerably lower than the average response rate of 65-70% achieved previously when the survey was an in-house voluntary exercise.

The requirement to carry out the standardised survey according to the HEA template has limited the level of analysis/comparative data possible. For example, it is not feasible to make a real comparison between underlying statistics and trends from earlier in-house surveys with those gathered via the HEA survey.

The HEA Survey data was supplemented with additional information through carrying out LinkedIn searches for graduates who had not responded to the survey. While the quality of detail gleaned from these searches is not comparable to data gathered through direct engagement with the Graduate Outcomes Surveys, LinkedIn was regarded as a good source of valid detail regarding the career progression of individual graduates. Therefore, it is important to note that while the summary data for iadt presented on pg4-5 of this report is provided directly by the HEA from data uploaded via Banner, the subsequent listings and pie charts by programme are gathered from a combination of the data submitted to the HEA and the results of LinkedIn searches.

Paul felt that where possible it was important to try to maintain the level of detail that the Graduate Survey has managed to achieve since it was first produced in 2008. In particular, the listings of employers and further study progressions by course are of real interest to current students and staff. Fulfilling both the HEA requirements of the standardised Graduate Outcomes Survey and the requirement of individual iadt Departments and

programmes for detailed data is a real challenge under the current format. It is to be hoped that the format and methodology of this important annual survey can be refined to meet the needs of all concerned in the years ahead.

Paul expressed real appreciation to Somhairle Quigley Brennan, who, as Research Assistant, has provided invaluable assistance in preparing this report. Also, many thanks to David Doyle for his time and patience in working on the administering and uploading the survey data via Banner.

*Dawn O'Connor*

*On behalf of Paul Murphy*

*Careers Office, IADT*

# HEA Summary Stats

**Response Rate: 38%**

## Main Situation on the 31<sup>st</sup> of March 2019

The chart describes the graduates' main situation on the 31<sup>st</sup> of March 2019. 85% of Graduates were in employment or further study 4 months after graduation. 2% of 2019 graduates reported that they were due to start employment in the next three months and 9% reported they were unemployed.

# Employment

The chart describes the graduates' employment situation on the 31<sup>st</sup> of March 2019. Out of the graduates who reported they were in employment, 70% of graduates were in full time employment and 13% of graduates were in part time employment. 5% of 2019 graduates reported that they were due to start employment in the next three months and 12% reported they were unemployed.

## Further Study

The chart describes the graduates' study situation on the 31<sup>st</sup> of March 2019. Out of the graduates who reported they were in further study, 80% of graduates were pursuing further study full time and 20% part time.
